Government Azizul Hoque College, Bogura

Bachelor of Social Science
Government Azizul Hoque College, Bogura

Higher Secondary Certificate
Ranir Hat School and Technical College

Secondary School Certificate
Gohail Shilikha Dakhil Madrasa

Language

- Bangla (Native)
- English (Professional Proficiency)

Team Projects

Craving (Food delivery)

[GitHub Link](#) [Live Link](#)

- **Technologies** - Next.js, NextAuth.js, TypeScript, MongoDB, Tailwind CSS, Shadcn/UI.
- **My Contributions** - As a full-stack developer on this food ordering platform, I set up and integrated both the backend and frontend systems. I implemented secure authentication using NextAuth.js, enabling role-based access for Admins, Restaurant Owners, Riders, and Users. I also developed a responsive navigation bar, an informative About page, and a dynamic role-based dashboard. Additionally, I integrated Shadcn/UI to maintain a consistent and professional user interface throughout the application.

ForMyFans (For My Fans Only) – Marketplace Social Platform

[GitHub Link](#) [Live Link](#)

- **Technologies** - React 19, Vite 7, React Router, Zustand, Material UI, Socket.io, Stripe, Axios, and Recharts.
- **Key Features** - Social & Monetization: Features posts, live streaming, chat, and Stripe-powered subscriptions for creator earnings. E-Commerce & AI Studio: Full marketplace with order tracking and built-in AI image/video generation tools.
- **Descriptions:** ForMyFans is an all-in-one social media and creator monetization platform where creators can share content, live stream, post Instagram-style stories, chat in real time, sell products through their own e-commerce marketplace, and create AI-generated content.

Personal Projects

Volunteer management website

[GitHub Link](#) [Live Link](#)

- **Technologies** - React.js, MongoDB, Express.js, Node.js, Jwt, Firebase, and Tailwind css.
- **Key Features** - Features secure Firebase authentication and a dynamic dark/light theme, allowing users to browse volunteer listings and apply seamlessly. It includes an intuitive dashboard for managing profiles, tracking applications, and publishing volunteer need posts.
- **Descriptions**: Developed a full-featured volunteer platform featuring Firebase authentication and dynamic dark/light mode toggles. The platform enables users to explore public listings, view detailed role requirements, and submit volunteer applications seamlessly. Additionally, it includes comprehensive user dashboards and profile management tools to create, track, and manage volunteer need posts as well as submitted requests.

Certifications & Training

- Complete Web Development Course at Programming Hero
- Completed Responsive Web Design Course at Creative IT Institute

SOFT SKILLS

- Quick learning
- Teamwork

HOBBIES AND INTERESTS

- Reading Islamic books to deepen spiritual knowledge and understanding
- Exploring new technologies
- Traveling to new places to experience diverse cultures and broaden perspectives
